Projects/Experience

Restaurant Scout Naples

Tech Stack : *React | NodeJs | Express| PostgreSQL | SQL*

Website created for users to rate, review, create , update and delete restaurants created . Using Google's API, this site allows users to view a restaurant's atmosphere, images, amenities, accessibilities and also health and safety information.
- Used React for Front-End Interface
- Gives users the ability to create new restaurants, rate restaurants out of 5 stars , and to leave a review which is saved to the database using PostgreSQL.
- Handles user access routes by employing Node, RESTful API's and Express
- Site Link

Anywhere Fitness

Tech Stack : *React | ReduxJs | NodeJs | Express| SQL | Knex*

Website created for users to Register for classes that Instructors create. Allows users to pay for classes and view a schedule of upcoming classes.
- Allows Instructors to register and login to the Admin dashboard, create classes and set their price for clients.
- Allows clients to register and login to the dashboard, sign up and pay for classes.
- React.Js and bootstrap front end work.
- Express, RESTful API's, SQL and Knex are used for the back end.
- Site Link

School In The Clouds

Tech Stack : *React | ReduxJs | NodeJs | Express| SQL | Knex*

Created this site with a Team of Developers for a School In The Cloud or online based learning.
- The site allows Instructors to be able to log in as an instructor and make Classes
- Allows students to select classes and give them access to a schedule.
- Site Link
